AGENTS ALLOW VIBE-CODING

Andrej Karpathy

@karpathy

...

There's a new kind of coding I call "vibe coding", where you fully give in to the vibes, embrace exponentials, and forget that the code even exists. It's possible because the LLMs (e.g. Cursor Composer w Sonnet) are getting too good. Also I just talk to Composer with SuperWhisper so I barely even touch the keyboard. I ask for the dumbest things like "decrease the padding on the sidebar by half" because I'm too lazy to find it. I "Accept All" always, I don't read the diffs anymore. When I get error messages I just copy paste them in with no comment, usually that fixes it. The code grows beyond my usual comprehension, I'd have to really read through it for a while. Sometimes the LLMs can't fix a bug so I just work around it or ask for random changes until it goes away. It's not too bad for throwaway weekend projects, but still quite amusing. I'm building a project or webapp, but it's not really coding - I just see stuff, say stuff, run stuff, and copy paste stuff, and it mostly works.

HOW TO TEST FRONTEND?

TESTING IN PRODUCTION
DOM COMPONENTS ANALYSIS
"LOOK" AT THE UI

MCPS OF NOTE

- ✗ Context7
- ✗ Puppeteer
- ✗ Sequential Thinking
- ✗ GitHub
- ✗ [punkpeye/awesome-mcp-servers](https://github.com/punkpeye/awesome-mcp-servers)

BUT WHOSE CODE IS IT?

@JBARUCH

@GAMUSSA

#DEVOXXPL

SPEAKING.JBARUCH

SPEAKING.GAMOV.IO

WE (LLM) READ THE EULA SO YOU WON'T HAVE TO

- ✗ You own it, but it's not unique
- ✗ Only Junie skips training on your code by default
- ✗ Only Copilot filters viral OSS code & offers indemnity
- ✗ Only Copilot warns about and blocks matching OSS code
